Heating Season Information

During these cold winter months, please note that it is against the law for the utility companies to turn of your heat for falling behind on your utility bill payments. However, even if you cannot afford to pay your entire bill each month due to the increase costs this winter, always try to pay as much as you can every month. In the spring, when the utility companies start disconnecting services because of money owed, they are more willing to work with you to keep your services connected if you made regular payments throughout the winter season– even if it was not the full amount. Also, remember to try and be energy conscious to keep your utility costs low and don't forget to contact Energy Services Inc. at (608) 333 -0333 for possible financial assistance, if needed.
